The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. 11. Power Sources – This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your product dealer or local power company. For products intended to operate from battery power, or other sources, refer to the operating instructions.
12. Grounding or Polarization – This product may be equipped with a polarized alternating-current line plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug.

See Figure A.
15. Lightning – For added protection for this product during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the product due to lightning and power-line surges.

Power Lines – An outside antenna system should not be located in the vicinity of overhead power lines or other electric light or power circuits, or where it can fall into such power lines or circuits. When installing an outside antenna system, extreme care should be taken to keep from touching such power lines or circuits as contact with them might be fatal.

17. Overloading – Do not overload wall outlets, extension cords, or integral convenience receptacles as this can result in a risk of fire or electric shock.

 - f) When the product exhibits a distinct change in performance – this indicates a need for service.
21. Replacement Parts – When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards.

Required system

Broadband Internet connection

A broadband line connection to the Internet is required in order to use the ASD-3N's Internet radio function and firmware update.

Modem

This is a device that is connected to the broadband line to communicate with the Internet. Some are integrated with the router.

Router

- When using the ASD-3N, we recommend you use a router equipped with the following functions:

- Built-in DHCP (Dynamic Host Configuration Protocol) server

This function automatically assigns IP addresses on the LAN.

- Built-in 100BASE-TX switch

When connecting multiple devices, we recommend a switching hub with a speed of 100 Mbps or greater.

□ Ethernet cable (CAT-5 or greater recommended)

Use for wired LAN.

- The ASD-3N does not come with an Ethernet cable.
- Some flat type Ethernet cables are easily affected by noise.

We recommend using a normal type cable.

□ Computer

A computer with the following specifications is required to use a music server:

- OS
Windows® XP Service Pack2, Windows Vista
- Software (Prepare one of the following.)
 - .NET Framework 1.1 and Windows Media Connect (Windows XP)
 - Windows Media Player ver.11
 - DLNA-compatible server software
- Internet browser
Microsoft Internet Explorer 5.01 or later
- LAN port
- 300 MB or more free disk space

※ Free disk space is required to store music and video files. The following sizes are approximate.

Format	Bit rate	Per minute	Per hour
MP3 / WMA	128 kbps	Approx. 1 MB	Approx. 60 MB
	192 kbps	Approx. 1.5 MB	Approx. 90 MB
	256 kbps	Approx. 2 MB	Approx. 120 MB
	392 kbps	Approx. 3 MB	Approx. 180 MB
WAV (LPCM)	1400 kbps	Approx. 10 MB	Approx. 600 MB
FLAC	1080 kbps	Approx. 7.7 MB	Approx. 464 MB

For connections to the Internet, contact an ISP (Internet Service Provider) or a computer shop.

NOTE

- A contract with an ISP is required to connect to the Internet.
No additional contract is needed if you already have a broadband connection to the Internet.
- The types of routers that can be used depend on the ISP. Contact an ISP or a computer shop for details.
- Depending on the server, video files may be displayed, but they cannot be played on the ASD-3N.

□ Others

- If you have an Internet provider contract for a line on which network settings are made manually, make the settings at GUI menu "Setup" – "Network" – "Network Setup" (☞ page 11).
- With the ASD-3N, it is possible to use the DHCP and Auto IP functions to make the network settings automatically.
- When using a broadband router (DHCP function), the ASD-3N sets the IP address, etc., automatically.

When using the ASD-3N connected to a network with no DHCP function, make the settings for the IP address, etc., at GUI menu "Setup" – "Network" – "Network Setup" (☞ page 11).

- The ASD-3N is not compatible with PPPoE. A PPPoE-compatible router is required if you have a contract for a line of the type with which the PPPoE is set.
- Depending on the ISP with which you have your contract, it may be necessary to make proxy server settings to use the Internet radio function. If you made proxy server settings on the computer to connect to the Internet, make the proxy server settings on the ASD-3N in the same way.

GUI Menu Operations

With the ASD-3N, settings and operations for most functions can be performed by operating while looking at the GUI menus displayed on the monitor screen.

Example of the Display of the GUI Mark at a Title

Items for which this mark is indicated at the title can be operated from the GUI.

We recommend performing such operations from the GUI.

- Information regarding the Firmware Update function will be announced on the DENON web site each time related plans are defined.
- A broadband connection to the Internet is required to use this function (page 7).
- Even with a broadband connection to the Internet, approximately 1 hour is required for the updating procedure to be completed. Once updating starts, normal operations on the ASD-3N cannot be performed until updating is completed.

Furthermore, updating the firmware may reset the backup data for the parameters, etc., set for the ASD-3N.

NOTE

- Connection to the network and specific settings are required to update the firmware. For details, see page 7, 11
- Do not turn off the power until updating is completed.

Playing Network Audio

This procedure can be used to play Internet radio stations or music or still picture (JPEG) files stored on a computer.

□ About the Internet radio function

- Internet radio refers to radio broadcasts distributed over the Internet. Internet radio stations from around the world can be tuned in.

The ASD-3N is equipped with the following Internet radio functions:

- Stations can be selected by genre and region.
- Internet radio stations in MP3 and WMA (Windows Media Audio) format can be listened to.
- Your favorite radio stations can be registered by accessing an exclusive DENON Internet radio URL from a Web browser on a computer.

※ The function is managed for individual users, so you must provide your MAC or e-mail address.

Exclusive URL: <http://www.radiodenon.com>

- The ASD-3N's Internet radio station list is created using a radio station database service (vTuner). This database service provides a list edited and created for the ASD-3N.

※ The radio station database service may be suspended without notice.

□ Music server

This function lets you play music files and playlists (m3u, wpl) stored on a computer (music server) connected to the ASD-3N via a network.

With the ASD-3N's network audio playback function, connection to the server is possible using one of the technologies below.

- Windows Media Player Network Sharing Service
- Windows Media DRM10

【Album art function】

When a WMA (Windows Media Audio), MP3 or MPEG-4 AAC file includes album art data, the album art can be displayed while the music files are playing.

For music files in WMA (Windows Media Audio) format, the album art is only played when using Windows Media Player ver. 11.

【Slide show function】

Still picture (JPEG) files stored in folders on a music server can be played as slide shows.

The time for which each picture is displayed can be set.

When still picture (JPEG) files are played on the ASD-3N, they are played in the direction in which they are stored in the folder, so store in them in the direction in which you want them to play.

Installing Windows Media Player ver. 11

- ① If Windows XP Service Pack 2 has not yet been installed, either download it free of charge from Microsoft or install it via a Windows update installer.
- ② Download the latest version of Windows Media Player ver. 11, either directly from Microsoft or using a Windows update installer.

※ When using Windows Vista, there is no need to download a new version of Windows Media Player.

Troubleshooting

If a problem should arise, first check the following:

1. Are the connections correct?
2. Is the set being operated as described in the owner's manual?
3. Are the other components operating properly?

If this unit does not operate properly, check the items listed in the table below. Should the problem persist, there may be a malfunction.

In this case, disconnect the power immediately and contact your store of purchase.
